PYRAMIS

Introduction to PYRAMIS GROUP

PYRAMIS is one of the leading stainless sink manufacturers in the world with a growing multinational network.

Having created a solid technological infrastructure using years of industry expertise, the company has developed significant international market presence. This has enabled PYRAMIS to establish an efficient sales network in more than 50 countries, including the UK.

Our heritage

Years of experience, vision and expertise have raised the profile of PYRAMIS in all markets. Its leading position is the result of the company's commitment to satisfy the differing needs of its domestic and non-domestic customers.

New corporate identity

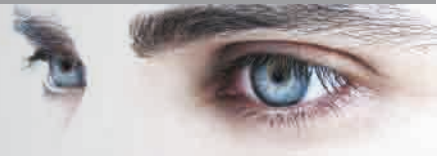

After nearly 50 successful years in business, 40 of which in the worldwide stainless sink industry, the company has created a new corporate identity to reflect its global expansion.

The new corporate identity reflects the symbol of a pyramid. 'Using a broad base to increase rapidly and progressively – step by step'.

The new PYRAMIS was designed to be visually attractive and to reflect the company's corporate objectives and core values. The strapline was devised to represent the company's intention to offer integrated kitchen solutions for all our customers. 'Kitchen Inspirations' determines our sector of activity in the market while simultaneously indicating a modern, ambitious and design orientated company.

Mission-Vision-Values

▶ Our mission is to develop and offer complete solutions for the kitchen (and bathroom) that are characterised by high quality functional design. We intend to offer an added value service from a business which is always represented by a human face.

Our vision is to become a powerful, competitive and internationally recognisable group of companies that offers a complete range of products and services, while responding speedily and effectively to the challenges presented by a dynamic environment.

▶ *Honesty*

▶ *Integrity*

▶ *Reliability*

▶ *Teamwork*

▶ *Commitment to the fulfilment of corporate goals and priorities*

▶ *Responsibility*

▶ *Professionalism - Effectiveness*

▶ *Acknowledgment and Rewarding of individual and group effort*

▶ *Extending our Knowledge base*

▶ *Self-awareness and Self-evaluation*

▶ *Passion for our work*

Quality

PYRAMIS is dedicated to providing the utmost quality and excellence in all its products and services, and this forms the foundation of the company's strategies and activities. These essential factors are what give the company its competitive edge, and every PYRAMIS product features CE certification.

PYRAMIS is ISO 9001:2000 certified, ensuring high standards of quality for its products.

PYRAMIS is dedicated to the protection of the environment and possesses the EMAS and ISO 14001 environmental certificates. The EMAS certification is voluntary, and highlights the company's commitment to ecological preservation.

PYRAMIS possesses the OHSAS 18001 human resources certificate.

Web site

▶ At PYRAMIS, we believe that effective communication is a two-way process. In order to understand the needs and desires of our partners and customers, we have developed a user-friendly website for each of our

subsidiaries. We continually work to update the site as we aim to offer a powerful tool that is quick and efficient for all purposes.

▶ Home page
The home page is designed as the starting point to easily reach any available information about the company and individual product categories.

▶ Subsidiary site selector
The entry page is designed to provide direct access to all individual websites of our subsidiaries. At the same time a small company profile for PYRAMIS Group is presented.

▶ Product Family
The product family page provides important information about the selected product category allowing the user to study the unique selling point of any available model.

▶ Product series selector
Provides all the available product series according to the selected product category. This page is the gateway of the analytical presentation of any selected model that will follow at the product data sheet.

▶ Product data sheet
This is an analytical presentation of the selected product code. It contains a product image, a linear drawing, important technical specifications, the optional accessories and generally all the essential information that any user needs.

ANALYSIS OF STAINLESS STEEL SINKS CHARACTERISTICS

▶ PRODUCT CODE

Each nine-digit product code represents a particular sink with its own unique specifications.

CODE	FINISH	WASTE	PACKAGING
100090601	BRUSHED STEEL	Ø92	CARTON BOX

▶ STAINLESS STEEL FINISH

There are a variety of stainless steel finishes. The PYRAMIS stainless sinks range incorporates a choice of smooth, linen and microlinen finishes. Brushed stainless steel is a new finish that is exclusive to our Tetragon models.

▶ BOWL POSITION - TAP HOLE(S)

The left or right hand position of the bowl in an installed sink defines the sink as left hand or right hand. In the case of two bowl sinks with one large and one smaller bowl, the position of the larger bowl defines the sink as a left or right hand.

▶ 1+1 TAP HOLES

When the model has 1+1 tap holes, this means that it can also be installed in reverse, and can be either a left or right hand bowl according to a customer's need. In this case, the tap hole that is located at the back of the sink, is for the tap installation, whereas the second tap hole at the front can be covered with a tap hole stopper, or can be used for the installation of an automatic valve. (Pop-up waste)

▶ 1 TAP HOLE

Indicates that a sink is offered with one tap hole for the placement of the tap, and the position of the bowl is either right or left hand side.

▶ In cases where a sink is offered with 2 tap holes, usually one next to the other, this means the sink is not reversible. One aperture is for the tap and the other will normally be used for a soap dispenser or an automatic valve (pop-up waste).

▶ WASTES

The number used to define the type of waste is the diameter of the outflow. The sinks are available with 52mm, 60mm or 92mm diameter outflow.

CODE	FINISH	WASTE	PACKAGING
100090601	BRUSHED STEEL	Ø92	CARTON BOX

▶ OVERFLOW

All PYRAMIS sinks are supplied with an overflow as shown on the drawings, for the avoidance of water flooding in cases of closed outflows. The overflow can be either in the bowl or on the drainer of the sink.

▶ PACKAGING

There are two different types of packaging, in a carton box or a sleeve. Carton boxes usually include the valve, siphon and in some cases accessory/ies relevant to the packed sink. Sleeve packaging includes only the sink. The suitable valve(s) and siphon should be ordered separately by the customer.

Waste valves & siphon: In the presentation of individual sink model, you can find the drawing of the suitable waste valve and siphon according to the specifications of the codes appeared. PYRAMIS provides both usual and space saver siphons, as well as usual and pop up valves. For any other case of different sink specifications, from those shown in the presentation page of the model, please check for the suitable waste kit in the table of page 72.

▶ OPTIONAL ACCESSORIES

Apart from the special product sets, where the sink is provided with its own accessories, there are also a variety of specially designed accessories, suitable for the majority of the sinks shown. In this catalogue you can select the suitable accessory of any sink, by its reference code.

▶ PYRAMIS PROPOSED TAP

PYRAMIS provides an extensive range of kitchen taps, certified by the highest quality standards and distinguished by their innovative design. By taking into consideration the particular design of the following sink models, we have tried to match each sink with a complimentary kitchen tap in an attractive combination.

INSTALLATION DRAWINGS

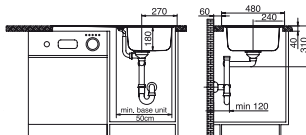

CUT OUT DRAWING

Is a detailed guide which will help you to produce an accurate cut-out in the worktop of the sink. It includes the cut-out length, width and corner radius applicable to the model concerned, including Inset, Undermount or Flush fitting.

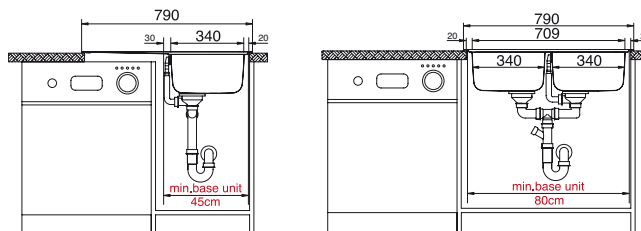

SIPHON INSTALLATION DRAWING

Gives you detailed information and measurements about how the space under the sink is formatted, after the installation of the siphon.

MINIMUM BASE UNIT

Refers to the required worktop length area underneath the installed sink.

INSTALLATION PROFILE OF SINKS

Illustrates, according to the different installation types, the way that the sink sits on the worktop.

INSTALLATION TYPES

INSET

The rim of the sink after installation appears on the worktop.

UNDERMOUNT

The rim of the sink appears underneath the worktop.

FLUSHMOUNT

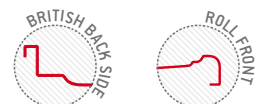

The rim of the sink appears at exactly the same level with the worktop.

BENDING TYPES OF ONSET SINKS

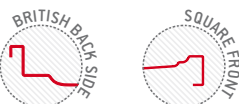

BRITISH ROLL FRONT EDGE

Describes the front edge of a British onset sink which is rounded.

BRITISH SQUARE FRONT EDGE

Is the second version of British onset sink where the two front edges are squared.

MODULES BENDING TYPE

PYRAMIS

The pure minimalist design of the recessed drainer is both practical and elegant.

A tight corner radius of just 14mm and generous bowl depth of 200mm provide unrivalled space.

STUDIO SERIES ELEGANT

The highest quality materials have been used to create this exceptional, yet functional sink series.

A stunning range of co-ordinated accessories add to the overall aesthetic.

PYRAGRANITE SINKS

PYRAMIS has built its excellent reputation for offering beautiful and functional stainless steel sinks. Responding to the growing demand for composite sinks, the company has developed its own collection of models, which provide a stylish alternative to its standard ranges. As with every product, every respect has been paid to the quality and colour standards that you would expect from a PYRAMIS product.

Satisfaction guaranteed

The unique advantage that characterizes the new PYRAGRANITE range is the revolutionary internationally patented molding method of production (GPS system). This method is an advanced self hardening composite material molding technology for kitchen sinks. The ultimate outcome of this molding technology is the even distribution of the components in the whole mass of the sink. The attributes of the sinks produced under this molding system are the increased resistance to impact, thermal shocks, and high temperatures, as well as an advanced look of the whole sink surface.

Materials

The new Pyragranite range is offered in two separate materials, GRANITE and METAL. Both feature 10 year guarantees.

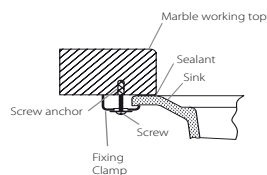

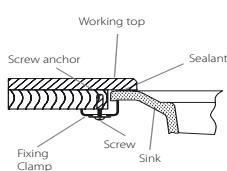

Quality Systems and Certificates

The production of PYRAGRANITE TETRAGON, AVANT & HYDRIA series is certified by EN ISO 9001, ISO 14001, ITS (Intertek Testing Service Certification) for the American market, and EN 13310, a European norm for thermosetting composite sinks.

MORE THAN ONE TETRAGON!

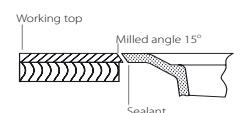

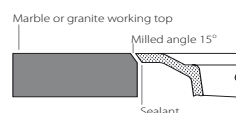

Undermount Installation

Tetragon sinks can be installed under the counter, offering a subtle and modern way of placement.

Flushmount Installation

One more way to enjoy a tetragon model is to place it on the same level with your counter. The sink and counter outline is milled to a 15° degree angle, to match perfectly.

MATERIAL TYPES & COLOURS

▶ **Granite Type Colours**

Their chemical composition derives from natural granite granules, representing almost the 80% of the mass, with the rest to be colourless resin. The desired colouring of the finished product is obtained through an accurate choice of granite particles of a particular colour. It preserves the visual and textural effect of the natural stone.

GRANITE WHITE

GRANITE GREY

GRANITE BEIGE

GRANITE GRAPHITE

GRANITE SAND

GRANITE BLACK

▶ **Metal Type Colours**

The chemical composite is made of natural granite and acrylic resin. The unique advantage is that metal particles have been added among the elements mentioned, which confers an outstanding aesthetic finish. The composition of the mixtures is aimed at obtaining different metal looking effects and thus fit perfectly with stainless steel or other metallic appliances. Chromo metal particles give the chromium metallic color, Cast iron metal particles give the graphite metal colour, Aluminum particles give the aluminum metallic color and Titanium gives the titanium metal color.

PYRAGRANITE PETRA

PYRAGRANITE PETRA

The word PETRA means 'stone' in Greek and this smooth and stylish stone sink series is created for kitchens with granite or composite worksurfaces to add a complementary or streamlined effect. Featuring a minimalist contemporary design, the smooth-to-the-touch drainer features an etched surface, which is attractive yet functional – allowing excess water to flow away with ease into the half bowl sink.

KITCHEN TAPS

Whether you are looking for traditional or cutting-edge design, PYRAMIS offers a stunning range of complementary taps to suit all expectations. A wide range of sink mixers are certified by the highest quality standards and also incorporate the innovative design and performance of our sinks collections. Our extensive and exclusive range will look good with any of our sink options and we have even chosen the perfect combinations throughout the brochure to make life even easier.

CHARACTERISTICS

PYRAMIS taps are manufactured according to the highest quality standards and their main advantages are their ergonomic, modern design and their durability. There is a complete range of products in satin and chrome that highlight and complement PYRAMIS stainless steel and PYRAGRANITE sinks.

▶ **Pure elegance**

The distinctive design is the hallmark for PYRAMIS taps. They are superbly formulated and crafted to offer years of dependable use and long-lasting beauty. The current additions of the AVRA and SYMETRIA models represent our commitment to an innovative approach.

▶ **Professional creation**

The use of professional tap models in home kitchens is a new trend, which promises exceptional style and functionality. The MAESTRO & MUSA models are the solution to the tasks of a challenging workload.

▶ **Hidden properties**

All taps are manufactured using state-of-the-art production technology. Each model has ceramic disc cartridges, which regulate both water flow and temperature. Moreover, the innovative pull out spray of RONDELA, PRESTO, ARIATA and ARMONIA models, simply eliminates unreachable areas.

▶ **ISO 9001**

PYRAMIS taps are produced according to ISO 9001:2000 requirements (clarifications may be obtained by consulting EQA).

The use of the specific mark indicates accreditation in respect of those activities covered by the accreditation certificate number 47.

Pressure Conditions

All models are suitable for water pressure starting from 1 bar to maximum of 5 bar. For pressure conditions different from 1-5 bar suitable accessories are available for adaptations upon request.
